## Software Tool:Copernic Summarizer

Center for Regulatory Research, LLC is now offering software tools for research and risk assessment through Digital River's software affiliate program. That means you can order through our C4RR store on our web site, purchase and download from Digital River's secure web site.

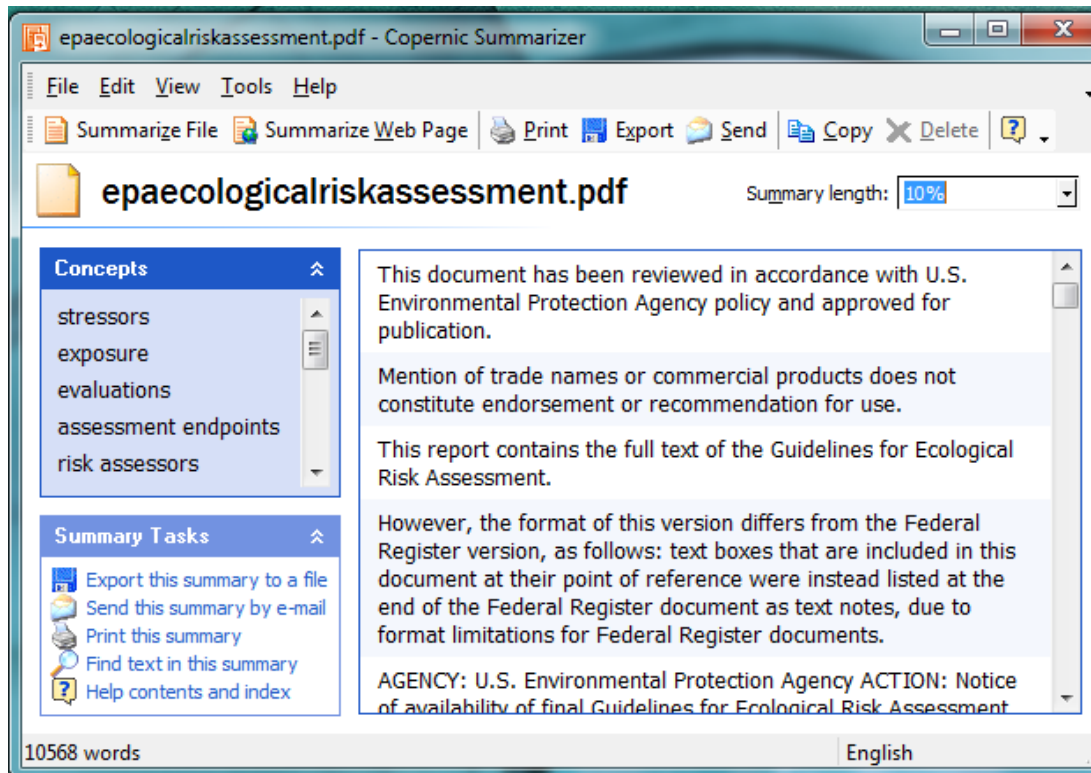

Are you overwhelmed with information from web sites, research papers, and government reports? You might consider purchasing Copernic summarizer software (<http://www.copernic.com>). This software summarizes the salient points from Word documents, pdf files, web pages, text pages and other applications. You can create outlines, assist in creating executive summaries for documents, and identify key concepts. Copernic summarizer is extremely helpful in dealing with lengthy documents that need to be summarized. The software is easy to install and use. A 30 day trial version is available on the company web site for you to try.

Summary of Biotechnology Web Page on Wikipedia at 5% length  
<http://en.wikipedia.org/wiki/Biotechnology>

Summary of Environmental Protection Agency's Report on Guidelines for Ecological Risk Assessment, 1998

A pdf file was summarized at 10% length of the document but other % lengths or word numbers may be selected.

Copernic summarizer lists concepts on the left hand side and allows the user to export the summary to a file, send the summary by email, print the summary, and find text in the summary.
